

ENVIRONMENTAL POLICY

Our Policy complies with the requirements of ISO 14001: 2015 and Policy of our Parent Company.

We will integrate our environmental principles, programs, and practices in line with the management of our business. We will ensure our suppliers and contractors are aware of our commitment & encourage their involvement.

We will educate and motivate our employees to work in an environmentally responsible manner and provide relevant information regarding our environmental performance to our employees, the local community, regulating authorities, and other relevant interested parties, and maintain Emergency Plans for potential on and off site incidents.

We will carry out regular monitoring, audits, and reviews to assess our environmental performance against current best practice, assess the environmental impact of any new developments or projects, and set publicly available objectives to reduce polluting emission, to both air and water, reduce waste disposal, and to encourage reuse and recycling, usage of sustainable resources, climate change mitigation and adaption.

In striving for environmental excellence, we are committed to the protection of the environment, pollution prevention, and compliance with, or whenever possible, exceeding legislative requirements and continual improvement of the environmental management system to enhance environmental performances
